

AIR QUALITY PERMITTING

& DISPERSION MODELING

Linebach ■ Funkhouser, Inc.
environmental compliance & consulting

Breathe Easier.

You need a dependable partner to completely handle issues so you can focus on your bottom line.

Linebach ■ Funkhouser manages permits from application to implementation.

Dedication Matters.

LFI can help you...

- Obtain workable permit conditions and the correct permits
- Develop emission factor calculations
- Negotiate with regulatory agencies
- Design site specific plans to maintain compliance
- Create custom spreadsheets for future calculations

Air Quality Permit Types

- Federal, state, and local regulatory programs
- Construction
- Operating
- Permit modifications
- State-origin
- Title V
- Prevention of Significant Deterioration

Dispersion Modeling

Modeling is an important part of the permit application and chemical release scenarios. Whether a facility or point source air emissions model is implemented, we will interpret the output and develop cost-effective solutions.

Emissions Inventories & Calculations

- Inorganic chemical manufacturing
- Automotive parts suppliers
- Printing facilities
- Brick and tile manufacturing
- Appliance and furniture manufacturing

When Results Matter™
